

Online Backup & Recovery

ABOUT AMERIVALT-AV

AmeriVault-AV is a secure, online backup and recovery service based on Asigra TeleVaulting technology. With redundant vaults in multiple data centers, the AmeriVault-AV is an industry leader in performance, availability, and reliability.

MobileVault, a unique service option, provides temporary, secure, on-site vaults for initial backups and high-speed data recovery.

AmeriVault-AV surpasses SAS 70 Type II audit requirements and satisfies integrity and security requirements for HIPPA, SEC, and other data privacy and availability regulations.

Reliable, Automatic, Secure, and Affordable

Horizon's online backup and recovery services, powered by AmeriVault, provide your business with an affordable, robust solution for protecting your business. Forget failure-prone tape systems, **AmeriVault-AV** delivers fast, one-step backup and offsite storage with quick restores and military-grade encryption.

With no hardware to install and maintain, no media to buy and replace, and no software to license, you save money. A single software client manages backups for your entire network. You pay only for the storage space you use in the vault, and embedded compression and de-duplication technology reduce network use and the size of your vault.

Once configured, your backups run automatically within defined windows. Or, use Continuous Data Protection for real-time protection 7x24x365. You define your retention plans and duration to meet your data recovery and compliance needs.

MobileVault Service

Backups are easy; Recovery is the real challenge. Need to recover a large data set or a full server? Restoring files from tape or over the Internet can be slow. Horizon's MobileVault service, unique in the industry, delivers an encrypted, secure copy of your data to your site. Recover data at speeds up to 1000 times faster than the speed of most Internet connections.

The MobileVault service also provides a fast, secure means of moving your initial backup into the vault.

Safe and Secure

AmeriVault uses military-grade encryption technology to protect your data in the vault and in-transit between your network and the vault. Your vault is instantly replicated across multiple systems in the primary data center and to a remote data center, ensuring availability even in the face of large scale natural disasters.

Fast and Furious

AmeriVault-AV uses block-based, reverse-incremental technology, along with data compression and de-duplication to minimize network bandwidth and vault space used. After the initial backup, only changes are transmitted and every backup looks like a full backup of your system – no searching for the right backup.

Advanced Features

AmeriVault-AV includes several advanced features at no additional cost, including:

- Granular backups for MS Exchange, to the message level
- Local Backup Copy
- Centralized Management Console
- Integrity Verification & Healing

Horizon Info Services delivers industry-leading, enterprise-class, technology services to small businesses at affordable prices. Serving businesses of 1 to 500 employees, Horizon's planning, implementation, and support services help smaller organizations leverage these services while reducing costs.
